B.E.IB.Tech (Full Time) DEGREE END SEMESTER EXAMINATIONS, April / May 2014 AGRICULTURE \& IRRIGATION ENGINEERING THIRD SEMESTER - (REGULATIONS 2008)

## Al 9201 - SURVEYING

Time: 3 hrs
Max Marks: 100

## Answer ALL Questions

## Part $-\mathrm{A}(10 \times 2=20$ Marks)

1. What is hypotensual allowance in chain surveying?
2. Define Reciprocal Ranging?
3. Differentiate Prismatic Compass and Surveyor's Compass
4. Define Isogonic and Agonic line
5. Why both verniers are read in Theodolite?
6. The magnetic bearing of line as observed by the prismatic compass at a survey station is found to be $272^{\circ}$. If the local attraction at this station is known to be $5^{\circ} \mathrm{E}$ and the declination is $15^{\circ}$.west, what is the true bearing of the line?
7. How will you identify the terrain from contour map?
8. Write the assumptions of Simpson's one-third rule for area calculation
9. Calcuiate the length, Tangent length and Mid ordinate distance of a simple curve with radius R and deflection angle $\Delta$.
10. What is closing error and how can it be eliminated.

## Part - B ( $5 \times 16=80$ Marks)

1. A 30 m steel tape measured 30.015 m when standardized fully supported under a 70 N pull at a temperature of $20^{\circ} \mathrm{C}$. The tape weighed $0.9 \mathrm{Kg}(9 \mathrm{~N})$ and had a cross sectional area of $0.028 \mathrm{~cm}^{2}$.co-efficient of expansion $=1.15^{*} 10^{-5}$. What is the true length of the measured distance $A B$ for the following condition?

| Measured Distance AB | $=114.095 \mathrm{~m}$ |
| :--- | :--- |
| Averaged Temperature | $=12^{\circ} \mathrm{C}$ |
| Means of Support | $=$ Suspended |

Tension $=100 \mathrm{~N}$

12 (a) The following are staff readings taken in order on a particular scheme the back sight being underlined. $\underline{0.813}, 2.170,2.908,2.630,3.133, \underline{3.752}, 3.277,1.899$, $2.390,2.810,1.542,1.274,0.643$. The readings were taken on a BM 39.563m.

Enter the readings in level book form. Check the entries and Find the Reduced level of the points.
(OR)
(b) The following bearings were taken in running a compass traverse. At what stations do you suspect local attraction? Find the correct bearings of the lines and also compute the included angles.

| Line | $F B$ | $B E$ |
| :--- | :--- | :--- |
| $A B$ | $80^{\circ} 10^{\prime}$ | $259^{\circ} 0^{\prime}$ |
| $B C$ | $120^{\circ} 20^{\prime}$ | $310^{\circ} 50^{\prime}$ |
| $C D$ | $170^{\circ} 50^{\prime}$ | $350^{\circ} 50^{\prime}$ |
| $D E$ | $230^{\circ} 10^{\prime}$ | $49^{\circ} 30^{\prime}$ |
| $E A$ | $310^{\circ} 20^{\prime}$ | $130^{\circ} 15^{\prime}$ |

(16 marks)
13.(a)(i) Define Contour and Contour Interval. List the characteristics of Contour. (6 marks)
(ii) The following give the values in feet of the offsets taken from a chain line to an irregular boundary:

| Distance | 0 | 50 | 100 | 150 | 200 | 250 | 300 | 350 | 400 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Offset | 10.6 | 15.4 | 20.2 | 18.7 | 16.4 | 20.8 | 22.4 | 19.3 | 17.6 |

Calculate the area in Sq. yards included between the chain line, the irregular boundary and the first and the last offset by Simpson's rule. (10 marks)
(OR)
13. (b) Explain about the Volume Estimation of earth work
(16 marks)
14. (a) Calculate the heights and distances of the following cases
(i) Base of the object accessible
(ii) Base of the object inaccessible
(b) The measured lengths and bearings of the sides of a closed traverse are tabulated below: Calculate the lengths of DE and EA which could not be measured.

| Line | Length | Bearings |
| :---: | :---: | :---: |
| AB | 500 | $98^{\circ} 30^{\prime}$ |
| BC | 620 | $30^{\circ} 20^{\prime}$ |
| CD | 468 | $298^{\circ} 30^{\prime}$ |
| DE | L 1 | $230^{\circ}$ |
| EA | L 2 | $150^{\circ} 10^{\prime}$ |

(16 marks)
15. (a) List the methods of setting out simple curves and explain
(b) Two Tangents intersect at the chainage 1190 m , the deflection angle being $36^{\circ}$. Calculate all the data necessary for setting out a curve with a radius of 300 m by deflection angle method. The peg interval is 30 m . (16 marks)
