Roll No

ME-6005 (3) (CBGS)

B.E. VI Semester

Examination, May 2018

Choice Based Grading System (CBGS) Power Plant Engineering

Time: Three Hours

Maximum Marks: 70

Note: i) Attempt any five questions.

- ii) All questions carry equal marks.
- a) Discuss the working principle and application of MHD (Magneto Hydro Dynamic) Convertor.
 - b) How a fuel cell is different from a battery?
- a) What are the different types of cooling towers? Discuss any one.
 - b) What are the effects of climatic factors on station and equipment design?
- 3. a) What is internal treatment of feed water?
 - b) What is the principal requirement of fuel handling plant?

- /

4

- 4. a) State the importance of nuclear power in India.
 - b) Define the term: Radio Activity, Moderators and Binding energy concept.

5. a) Explain binding energy concept and mass defect.

b) Calculate the mass defect and binding energy per nucleon of oxygen. Given m_p =1.007277 amu, m_n =1.008665 amu, m_e = 0.00055 amu atomic mass of oxygen =15.99491 amu.

7

 a) Discuss the parameters on which the selection of site for a hydraulic power plant depends.

b) Explain hydrography. What are mass curves? How they are plotted?

7 Explain the following terms.

14

- a) Diversity factor.
- b) Plant factor and their influence on plant design.
- Economic performance and tariffs.

8. Write short notes on the following:

14

- a) Energy conversion.
- Power plant economics.
- Fission and fusion reactions.
- d) Load factor.
- Micro and pico hydro machines
