DATA COMMUNICATION AND COMPUTER
NETWORK

Time Allotted : 3 Hours Full Marks : 70

The figures in the margin indicate full marks.
Candidates are required to give their answers in their own words
as far as practicable.

GROUP – A

(Multiple Choice Type Questions)

1. Choose the correct alternatives for the following : $10 \times 1 = 10$
- i) Which layer of the OSI model does 'framing' ?
 - a) Network b) Presentation
 - c) Data link d) Physical.

 - ii) is a data communication system covering an area the size of a town or city.
 - a) LAN b) MAN
 - b) WAN d) None of these.

 - iii) Which topology features a point-to-point line configuration ?
 - a) mesh b) ring
 - c) star d) all of these.

- iv) In digital transmission
 - a) baud rate is equal to bit rate
 - b) baud rate is smaller than bit rate
 - c) baud rate is higher than bit rate
 - d) both (a) and (b).

- v) A repeater is a device that operates in the
 - a) physical layer
 - b) data link layer
 - c) presentation layer
 - d) session layer.

- vi) A method to manage network & interwork traffic to improve throughput is called
 - a) Flow control
 - b) Error control
 - c) Congestion control
 - d) None of these.

- vii) is an application layer protocol that transfers files between two sites.
 - a) SMTP
 - b) FTP
 - c) HTTP
 - d) all of these.

- viii) A TCP/IP protocol that allows a host to find its Internet address given its physical address
 - a) ARP
 - b) RARP
 - c) HTTP
 - d) SMTP.

- ix) A multimedia Internet service that allows users to traverse the Internet by moving from one document to another via links that connect them together is
- WAN
 - Wireless communication
 - WWW
 - None of these.
- x) After a message is decrypted, it is called
- plaintext
 - ciphertext
 - cryptonite
 - cryptotext.

GROUP – B

(Short Answer Type Questions)

Answer any *three* of the following. $3 \times 5 = 15$

- Compare between the TCP/IP and OSI reference model. 5
- What are baud rate and bit rate ? Establish the relationship between these two. 3 + 2
- Describe the structure of HDLC frame in detail. 5
- Describe the difference between TCP and UDP. 5
- Describe the concept of DNS. 5

GROUP – C

(Long Answer Type Questions)

Answer any *three* of the following. $3 \times 15 = 45$

- Explain the functions of router, bridge, gateways. 6
 - What is QOS? 4
 - What are the needs of modulation ? 5

8. a) Briefly explain IPv6 datagram. 5
b) Explain the concept of LAN, MAN & WAN. 7
c) Why is class of IP address needed ? 3
9. a) Compare between packet switching and circuit switching. 5
b) Compare among ASK, FSK and PSK with the help of the sketch. 10
10. a) What is network topology ? Write the advantages of ring topology over star topology. 2 + 3
b) What do you mean by piggy backing ? 5
c) Write the functions of preamble field of 802.3 frame. Describe the priority scheme of Token Ring LAN . 2 + 3
11. Write short notes on any *three* of the following : 3 × 5
a) Public key cryptography
b) DNS
c) Functions of each layer of OSI model.
d) X-25
e) ARP.
