P.T.O.

10. How would you design an evaluation and control process in a large established corporation ?
11. Write short notes on :
 - 1) Corporate Governance
 - 2) Blue Ocean Strategy.

SECTION – C (Compulsory)

12. The Evolution of Strategy at Procter and Gamble. (1×15=15)

Founded in 1837, Cincinnati-based Procter and Gamble has long been one of the world's most International companies. Today, P and G is a global colossus in the consumer products business, with annual sales in excess of \$68 billion, some 56% of which are generated outside the United States. P and G sells more than 300 brands – including Ivory soap, Tide, Pampers, IAMS pet food, Crisco, Gillette, and Folgers – to consumers in 180 countries. Production operations in eighty countries and employs close to 138,000 people globally.

P and G established its first foreign factory in 1915 when it opened a plant in Canada to produce Ivory soap and Crisco. This was followed in 1930 by the establishment of the company's first foreign subsidiary in Britain. The pace of international expansion quickened in the 1950s and 1960s as P and G expanded rapidly in western Europe and then again in the 1970s when the company entered Japan and other Asian nations. Sometimes P and G entered a nation by acquiring an established competitor and its brands, as occurred in the case of Great Britain and Jaw, but more typically the company set up operations from the ground floor.

By the late 1970s, the strategy at P&G was well established. The company developed new products in Cincinnati and then relied on semiautonomous foreign subsidiaries to manufacture, market and distribute those products in different nations. In many cases, foreign subsidiaries had their own production facilities and tailored the packaging, brand name and marketing message to local tastes and preferences. For years, this strategy delivered a steady stream of new products and reliable growth in sales and profits. By the 1990s, however, profit growth at P and G was slowing.

The essence of the problem was simple; P and G's costs were too high because of extensive duplication of manufacturing, marketing and administrative facilities in different national subsidiaries. The duplication of assets made sense in the world of the 1960s, when national markets were segmented from each other by barriers to cross-border trade. Products produced in Great Britain, for example, could not be sold economically in Germany due to high tariff duties levied on imports into Germany. By the 1980s, however, barriers to cross-border trade

serve national markets
and G's structure. It

competitors, such as Unilever, Kimber
beginning in 2003 to 200

Case Discussion Questions :

- 1) What strategy was Procter and Gamble pursuing until the late 1990s ?
- 2) Why did this strategy succeed for so many years ? Why was it no longer working by the 1990s ?
- 3) What strategy did Procter and Gamble adopt in the late 1990s and early 2000s ? Does this strategy make sense ? Why ?
